 SGE - Sagitta - *the Arrow*
 SGR - Sagittarius - *the Archer*
 UMA - Ursa Major - *the Great Bear*
 UMI - Ursa Minor - *the Lesser Bear*
 VIR - Virgo - *the Virgin*
 VUL - Vulpecula - *the Little Fox*

How to Use the Chart

South is at the bottom, if you hold the chart “up” against the sky, facing South, then East will be to your left and West to the right. (Or if you hold the map upside-down and face North, East will be to the right, West to the left.)

On the chart, the orange dashed line shows the celestial Equator; the green dashed-dotted line the Ecliptic. The Milky Way is outlined with a blue dotted line.

Date	Time
June 1	11:30 PM (EDT)
June 8	11:00 PM
June 15	10:30 PM
June 22	10:00 PM
June 29	9:30 PM

Because of the Earth’s motion around the Sun, the time for this chart changes slowly over time, roughly 1/2 hour earlier every week:

Planets

Mercury sets in evening twilight

Venus is well above the horizon in the evening twilight setting 2½ hours after the Sun

Mars is in Aries, rising just before the Sun.

Jupiter in Gemini, sets around 10:30 PM

Saturn is in Pisces, but rises around 2:30 AMe

Uranus is in Taurus, almost behind the Sun

Neptune is in Pisces, rises around 1:30 AM
